INTRAVENOUS FLUIDS

During surgery a pet's natural reaction to general anesthesia is for blood pressure to drop. This drop may be life threatening or also lead to damage to their kidneys. In an effort to prevent this from occurring we offer the administration of IV fluids to help support kidney function and regulate blood pressure. At Willamette Valley animal hospitals, our standard of care includes the placement of an IV catheter for all surgical procedures. In addition to the IV catheter, you can elect for the administration of iv fluids as an additional safety measure. The cost is \$60.00.

DENTAL RADIOGRAPH EXAMINATION

Dental radiograph examinations provide valuable information that helps your pet's Doctor evaluate your pet's oral health. With the help of radiographs, your pet's doctor can look at what is happening beneath the surface of your pet's teeth and gums. To ensure your pet receives the best dental treatment we recommend a dental radiograph series. The cost for the series is \$75.00-\$105.00. If the dental radiograph series is preventive and NO surgical extractions are necessary the cost will be \$75.00. Due to recent changes in the rules from the State of Oregon, should surgical extractions be necessary during the procedure this cost will increase to \$105 to enable post extraction films to be taken.
